PROFILE

Software engineering student with hands-on experience building backend and full-stack systems using modern frameworks and APIs. Strong foundation in data structures, algorithms, and scalable software development for real-world applications.

EDUCATION

Vidyalankar Institute of Technology, Mumbai	Wadala, Mumbai
Bachelor of Technology in Computer Engineering	2023– 2027
- Strong foundation in Data Structures, Algorithms, and Software Engineering Principles - Coursework includes Data Structures, Algorithms, Databases, Operating Systems	

SKILLS

Languages: Python, Go, JavaScript, TypeScript, C++ (DSA)
Backend: FastAPI, Express.js, Django, Flask, Go net/http, REST APIs, GraphQL
Frontend: React.js (basic), HTML, CSS, JavaScript, Next.js
Databases: PostgreSQL, MongoDB, Redis
Cloud & DevOps: AWS EC2, Docker, Git, Linux, Nginx
Systems & Messaging: Kafka, WebSocket, Webhooks
AI/ML (Integration): Gemini API, OCR, RAG-based pipelines

CERTIFICATIONS

- Basics Of Google Cloud Compute - oct 2025 ([link](#))
- Basics Of Pub Sub Google Cloud - oct 2025 ([link](#))

EXPERIENCE

Project-Based Software Engineering Experience

- Built and deployed multiple backend systems simulating real-world production workflows.
- Applied debugging, optimization, and system design principles across projects.
- Worked extensively with APIs, databases, asynchronous processing, and cloud deployment.

PROJECTS

TaskPlexus – AI Todo Planner (link)	2025
- Designed and implemented backend services in Go for task management and subscription workflows. - Integrated Razorpay webhooks and used transactional database updates for payment consistency. - Deployed services on AWS EC2 with Nginx and optimized performance using Redis caching.	
StudySync – AI-Powered Learning Platform (link)	2025
- Built backend services using FastAPI and Express to process user-uploaded study content. - Implemented OCR and Retrieval-Augmented Generation (RAG) pipelines to generate summaries and quizzes. - Designed asynchronous workflows using Kafka and WebSocket for real-time notifications.	
ndk-rpc-cluster – Distributed RPC System (link)	2025
- Designed a Node.js-based RPC framework enabling communication across multiple services. - Implemented service discovery, basic load balancing, and fault-tolerant request routing. - Focused on reliability and maintainability of inter-service communication.	

ACHIEVEMENTS

- Winner, Cognition Clash (AI/ML Showdown) for building StudySync AI. ([link](#))
- Finalist (Top 11 out of 400+ teams), HackBuild 2025 for developing EduMitra mobile application. ([link](#))
- Active open-source contributor with published Node.js packages on npm.
