

NAVNATH KADAM

Software Engineer Intern

☎ +919757382736 ✉ navnathkadam284@gmail.com 🐙 GitHub 🌐 LinkedIn 🌐 leetcode 🌐 Website 📍 Mumbai, India

PROFESSIONAL SUMMARY

Computer Engineering student with practical experience in backend development and AI integrations, including building scalable systems and real-time applications. Strong foundation in problem-solving, data structures, and system design. Looking to contribute to high-impact software engineering roles while deepening expertise in backend architecture and intelligent systems.

EDUCATIONS

Vidyalankar Institute of Technology Mumbai <i>Bachelor of Technology in Computer Engineering</i> Computer Engineering student (CGPA: 9.3/10) with experience in machine learning concepts, AI integrations, and full-stack development.	Jul 2023 - Present CGPA : 9.3/10
Ramnivas Ruia College Matunga, Mumbai <i>Higher Secondary Certificate (HSC)</i>	Jul 2021 - Jun 2023 CGPA : 80%
Dharmaprakash Shrinivas High School Sion, Mumbai <i>Secondary School Certificate (SSC)</i>	Jul 2020 - Jun 2021 CGPA : 93%

PROJECTS

Taskplexus - Ai Todo planner 🐙 Github <i>Individual Project</i> - Developed an AI-driven task and goal management system for real-time synchronization. Integrated Razorpay payment gateway using a secure, webhook-based architecture. Enhanced performance with Redis for caching and real-time updates. <i>Technologies / Tools Used : Go, PostgreSQL, MongoDB, React.js, Redis, Razorpay APIs</i>	Nov 2025 - Dec 2025
Study Sync Ai - Ai Learning Platform 🐙 Github <i>Individual Project</i> - Developed a full-stack AI-powered learning platform for processing PDF and YouTube content. Built backend pipelines using FastAPI and Node.js for document ingestion and AI workflows. Implemented real-time chat and event-driven communication with WebSockets and Kafka. <i>Technologies / Tools Used : React.js, FastAPI, Node.js, MongoDB, TensorFlow, Redis, Kafka</i>	Aug 2025 - Nov 2025
JSON-RPC-Engine – Distributed RPC System 🐙 Github <i>Individual Project</i> - Developed a distributed RPC framework to enable communication across multiple service instances. Implemented load balancing and fault-tolerant request routing, enhancing system reliability. Designed a service discovery mechanism for dynamic service registration and communication. <i>Technologies / Tools Used : Node.js, Express.js, Distributed Systems Concepts, Object Oriented Programming</i>	May 2025 - Jul 2025

SKILLS

Programming Languages :	Python, Go, JavaScript, TypeScript, C++
Frontend Development :	React.js, Next.js, Tailwind CSS, Zustand, Redux
Backend & Systems :	FastAPI, Express.js, Django
Core Concepts :	Data Structures & Algorithms, REST APIs, System Design Basics, RPC, GraphQL, OOP
Databases :	PostgreSQL, MongoDB, Redis
Soft Skills :	Teamwork, Communication, Time Management
Tools Platforms :	Git, Docker, Linux
Languages :	English, Hindi
Ai ML Concepts :	Tensorflow, Scikin-learn, Neural Networks, RAG, Ai Agents

AWARDS & ACHIEVEMENTS

- Winner – Cognition Clash (AI/ML Showdown)** for building **StudySync AI**, an AI-powered platform generating study summaries and quizzes using **OCR** and **RAG** pipelines.
- Finalist – HackBuild 2025 (Top 11 out of 400+ teams)** for developing **EduMitra**, an education-focused mobile application improving learning accessibility.
- Open-source contributor** with **Node.js packages published on npm** and contributions to backend tooling and developer ecosystems.
