PROFESSIONAL SUMMARY

Computer Engineering student with experience in building **end-to-end backend systems** and **AI-powered applications** using Python, Go, and Node.js. Developed production-ready projects involving APIs, databases, real-time communication, and cloud deployment on AWS. Implemented distributed workflows using Kafka, WebSockets, and Redis, integrating OCR and Retrieval-Augmented Generation pipelines to process large volumes of study content.

SKILLS

Programming Languages :	Python, Go, JavaScript, TypeScript, C++
Frameworks & Libraries :	FastAPI, Express.js, Django, Flask, React.js, Next.js
Tools & Platforms :	AWS EC2, Docker, Git, Linux, Nginx, Kafka, WebSocket, Webhooks
Databases :	PostgreSQL, MongoDB, Redis
Soft Skills :	Teamwork, Communication, Time Management, Problem Solving, Adaptability
Languages :	English, Hindi

PROJECTS

Taskplexus - Ai Todo planner | 🐙 Github Nov 2025 - Dec 2025

Individual Project

- **Designed** and **implemented** backend services in **Go** for task management and subscription workflows.
- **Integrated** Razorpay webhooks and used transactional database updates for payment consistency.
- **Deployed** services on **AWS EC2** with Nginx and **optimized** performance using Redis caching.

Technologies / Tools Used : go lang, postgres, React, Zustand, GenAi, Tailwind CSS, redis

Study Sync Ai - Ai Learning Platform | 🐙 Github Aug 2025 - Nov 2025

Individual Project

- Built backend services with **FastAPI** and **Express** to process **100+** user-uploaded study documents through structured API pipelines.
- Implemented **OCR** and **Retrieval-Augmented Generation (RAG)** pipelines to extract and process **500+** pages of content, automatically generating summaries and quizzes.
- Designed event-driven workflows using **Kafka** and **WebSockets** to enable real-time notifications and scalable asynchronous processing.

Technologies / Tools Used : React, MongoDB, rag, tensorflow, fastAPI, web socket, Node.js, redis

JSON-RPC-Engine – Distributed RPC System | 🐙 Github May 2025 - Jul 2025

Individual Project

- Designed a **Node.js**-based RPC framework enabling communication across **3+** distributed services in a modular microservice architecture.
- Implemented **service discovery** and **round-robin load balancing** to distribute requests across service instances and enhance system reliability.
- Built **fault-tolerant routing** and retry mechanisms to maintain stable inter-service communication during service failures.

Technologies / Tools Used : Node.js, Express, Fault Tolerance, OOP

EDUCATIONS

Vidyalankar Institute of Technology Jul 2023 - Present

Bachelor of Technology in Computer Engineering

CGPA : 9.3/10

Computer Engineering student (CGPA: 9.3/10) with experience in machine learning concepts, AI integrations, and full-stack development.

Ramnivas Ruia College Jul 2021 - Jun 2023

Higher Secondary Certificate (HSC)

CGPA : 80%

Dharmaprakash Shrinivas High School Jul 2020 - Jun 2021

Secondary School Certificate (SSC)

CGPA : 93%

AWARDS & ACHIEVEMENTS

- **Winner – Cognition Clash (AI/ML Showdown)** for building **StudySync AI**, an AI-powered platform generating study summaries and quizzes using **OCR** and **RAG** pipelines.
- **Finalist – HackBuild 2025 (Top 11 out of 400+ teams)** for developing **EduMitra**, an education-focused mobile application improving learning accessibility.
- **Open-source contributor** with **Node.js** packages published on **npm** and contributions to backend tooling and developer ecosystems.
