

Navnath Kadam

Software Engineer — Full Stack & Backend

Location: Mumbai, India — **Phone:** +91-9757382736 — **Email:** navnathkadam284@gmail.com

LinkedIn: [linkedin.com/in/navnath-kadam-883a57288](https://www.linkedin.com/in/navnath-kadam-883a57288)

GitHub: github.com/ndk123-web — **LeetCode:** leetcode.com/Ndk18

PROFESSIONAL SUMMARY

Computer Engineering undergraduate (CGPA 9.3+) with strong DSA fundamentals and hands-on full-stack/backend experience. Built and deployed 15+ production-style projects including distributed RPC systems, real-time applications, and AI-integrated platforms.

EXPERIENCE

Automation Engineer Intern

May 2026 – Present

Autonova AI

Remote, Mumbai

- Architected an automated Reddit lead-generation and data-scraping pipeline using Python, processing and validating 500+ daily posts to streamline user acquisition.
- Optimized backend data flow and API endpoints for the Body Athlete fitness platform, ensuring sub-second response times for workout logging and user analytics.

PROJECTS

FlowFrame – Distributed Systems Simulator

Jan 2026 – Jul 2026

GitHub: github.com/ndk123-web/flow-frame — Live: flowframe.taskplexus.app

- Architected interactive simulator visualizing 8 backend components (API Gateway, Load Balancer, Redis, PostgreSQL, Message Queues, Microservices) with real-time execution; 50+ daily active users.
- Engineered simulation engine with failure injection, caching strategies, and connection pooling; enabled hands-on distributed systems learning without cloud infrastructure costs.
- **Tech:** Node.js, Next.js, TypeScript, Tailwind CSS

TaskPlexus – AI Todo Planner

Nov 2025 – Dec 2025

GitHub: github.com/ndk123-web/taskplexus

- Engineered full-stack task management with Redis caching layer, cutting database read latency by 90% (10x faster reads).
- Integrated Razorpay webhooks with idempotency keys and database transactions, eliminating duplicate payments and ensuring financial data consistency.
- **Tech:** Go, PostgreSQL, MongoDB, React.js, Redis, Razorpay APIs

Study Sync – AI Learning Platform

Aug 2025 – Nov 2025

GitHub: github.com/ndk123-web/study-sync-ai

- Built AI-powered learning platform processing PDFs and YouTube videos into structured summaries and quizzes using Gemini API; implemented real-time chat with Kafka event streaming.
- Designed real-time communication pipeline with WebSocket and Kafka, enabling instant content delivery and chat across concurrent study sessions.
- **Tech:** React.js, FastAPI, Node.js, MongoDB, TensorFlow, Redis, Kafka

JSON RPC Engine

May 2025 – Jul 2025

GitHub: github.com/ndk123-web/ndk-rpc-cluster — NPM: [npmjs.com](https://www.npmjs.com)

- Designed and published auto-scaling JSON-RPC engine as open-source npm package; implemented dynamic load balancing with health-check failover.
- Implemented automatic replica recovery and health-check failover, ensuring resilient request handling with zero single points of failure.
- **Tech:** Node.js, Express

TECHNICAL SKILLS

Languages: Go, Python, JavaScript (ES6+), TypeScript, SQL

CS Fundamentals: Data Structures & Algorithms, OOP, System Design, DBMS, Operating Systems, Distributed Systems, Microservices,

Full Stack: Node.js, Express.js, FastAPI, Go, React.js, Next.js, PostgreSQL, MongoDB, Redis, GraphQL, WebSockets

AI & DevOps: LLM Integration, AI Agents, TensorFlow, RAG, Docker, AWS, GitHub Actions, CI/CD, Linux, Git

Also Familiar: Django, C++, Java, Firebase

EDUCATION

Vidyalankar Institute of Technology, Mumbai

B.Tech in Computer Engineering

Jul 2023 – Jun 2027

CGPA: 9.3/10

ACHIEVEMENTS & CERTIFICATIONS

Winner – Cognition Clash (AI/ML Showdown) for StudySync AI using OCR and RAG pipelines.

Google Cloud Certified: Introduction to Generative AI, Pub/Sub, Data Processing (2025).
